

task\_share.BaseShare

```
classDiagram
    class task_share_BaseShare["task_share.BaseShare"]
    class task_share_Queue["task_share.Queue"]
    class task_share_Share["task_share.Share"]
    task_share_Queue --|> task_share_BaseShare
    task_share_Share --|> task_share_BaseShare
```

The diagram illustrates a class hierarchy. At the top is the base class 'task\_share.BaseShare'. Below it are two subclasses: 'task\_share.Queue' on the left and 'task\_share.Share' on the right. A horizontal line connects the two subclasses, with a vertical arrow pointing upwards from the center of this line to the base class, indicating that both 'task\_share.Queue' and 'task\_share.Share' inherit from 'task\_share.BaseShare'.
