

task_share.BaseShare

```
classDiagram
    class task_share_BaseShare["task_share.BaseShare"]
    class task_share_Queue["task_share.Queue"]
    class task_share_Share["task_share.Share"]
    task_share_Queue --|> task_share_BaseShare
    task_share_Share --|> task_share_BaseShare
```

A UML class diagram illustrating inheritance. At the top is a box labeled 'task_share.BaseShare'. Below it are two boxes: 'task_share.Queue' on the left and 'task_share.Share' on the right. A horizontal line connects the two bottom boxes, with a vertical line extending upwards from its center to the bottom of the 'task_share.BaseShare' box, ending in an arrowhead. This indicates that both 'task_share.Queue' and 'task_share.Share' inherit from 'task_share.BaseShare'.

task_share.Queue

task_share.Share
